

Pete Bredehoeft has 28 years' experience with legacy CH2M/Jacobs performing cost estimating, construction management services and program management services. Pete, currently serves as the cost estimating technology leader. Pete is a specialist in cost estimating software and the integration of CAD with cost estimating software packages. Pete is also a lead estimator on various projects, which include water, wastewater, storm water and department of defense projects. Pete has extensive program management, capital estimating and capital improvement planning experience. He has developed a standard unit price and reporting format for legacy CH2M, which helps with data collection and benchmarking for cost estimating. Pete has developed an Escalation Tool which produces an escalation index by project type. Pete serves on the AACE International, Technical Board as the Director of Recommended Practices. Pete is a Certified Estimating Professional (CEP) from AACE International. Pete has achieved an award of Fellow from AACE International. Pete has worked on projects which range from small \$1M to large programs such as the Korea Base Relocation program, which is a \$10.6 billion dollar program and the Thames Tideway program £3.4 billion pound program. Mr. Bredehoeft lives in the Atlanta, Georgia area. Mr. Bredehoeft has degrees from Ferris State University in Big Rapids, MI: Associate of Science - Construction Engineering Technology, Associate of Science - Land Surveying, and Bachelor of Science - Construction Management.
