

SCHEDULING AI – WHERE ARE WE NOW

SCHEDULING AI – WHERE ARE WE NOW

Panel Discussion

Are you curious how today's AI-powered planning and scheduling tools perform on real-world projects? In this interactive session, attendees will put leading AI software to the test by posing real questions and challenges based on an actual project schedule. Watch as solutions from **ALICE**, **Nodes & Links**, **Planera**, and **SmartPM** respond in real time, demonstrating how their platforms generate insights, support decision-making, and address complex project scenarios. This audience-driven session offers a practical, side-by-side look at how AI can enhance planning and scheduling in today's projects.

**Area Scheduler
East Coast Team**
ZACHRY CONSTRUCTION CORPORATION

MODERATOR

Michael Pink

- Proactive Innovator in Real-Time Construction Analytics
- Visionary Founder Tackling Critical Path Challenges
- Pioneering Accessible Tools for Industry-Wide Impact

CO-FOUNDER & CEO
SMARTPM

KARL NOTTELMANN

- Champion of Seamless Collaboration and Execution
- Leader in Simplifying Complex Construction Challenges

SOLUTIONS ENGINEERING MANAGER
PLANERA

Jacob Cox

- Advanced practitioner across Industrial, Infrastructure, and Commercial construction sectors.
- Technology-driven innovator who advances and modernizes operational processes

ENTERPRISE ACCOUNT EXECUTIVE

Alice Technologies

Greg Lawton

- Pioneer in Project Intelligence and Complexity Management
- Champion of Data-Driven Decision-Making
- Innovative Leader in Simplifying Complex Systems

Phase 3

SEGMENT 02

Baseline Review – Insights

How can AI be leveraged to strengthen baseline review processes?

SEGMENT 03

Baseline Review- Assessing Risks

**How can AI support
early risk
assessment
through intelligent
summarization?**

SEGMENT 04

Progression Review and Risk

**What insights can
AI extract from
historical data to
shape our future
strategy?**
